IMPORTANT – Please Read and Follow

- Make sure that incoming voltage is the same as unit rating. An electric rating plate specifying voltage, frequency, wattage, amperage, and phase is attached to the product.
- To reduce the risk of fire, electrical shock, or injury to persons, installation work and electrical wiring must be done by a qualified technician in accordance with all applicable codes and standards, including fire-rated construction.
- The installer should leave these instructions with the consumer who should retain them for local inspector’s use and for future reference.

It is your responsibility to:
- Comply with installation specifications and dimensions.
- Properly install unit.
- Remove any moldings or decorative panels that prevent the unit from being serviced.
- Make sure that you have these materials (not provided with your unit), which are necessary for proper installation:
  - 1/4” (6 mm) copper tubing with shutoff valve
  - 6 – 8 x 3” (7.6 cm) wood screws (longer screws may be required)
  - 1/4”- Saddle valve (DO NOT use self-piercing feature of the valve)
- Assure that floor will support unit, door panels and contents (approximately 1200 pounds [540 kg]):
  - Provide a properly grounded electrical outlet.
  - Assure that location will permit appliance doors to open a minimum of 90°.

Your safety and the safety of others is very important.

We have provided many important safety messages in this manual and on your appliance. ALWAYS read and obey all safety messages.

This is the safety alert symbol. This symbol alerts you to hazards that can kill or hurt you and others.

All safety messages will be preceded by the safety alert symbol and the word “DANGER” or “WARNING.” These words mean:

**DANGER**

Hazards or unsafe practices which WILL result in severe personal injury or death

**WARNING**

Hazards or unsafe practices which COULD result in severe personal injury or death

All safety messages will identify the hazard, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.
IMPORTANT—Please Read and Follow!

A GFI shall be used if required by NFPA-70 (National Electric Code), federal/state/local laws, or local ordinances.

- The required use of a GFI is normally related to the location of a receptacle with respect to any significant sources of water or moisture.
- Viking Range Corporation will NOT warranty any problems resulting from GFI outlets which are not installed properly or do not meet the requirements below.

If the use of a GFI is required, it should be:

- Of the receptacle type (breaker type or portable type NOT recommended)
- Used with permanent wiring only (temporary or portable wiring NOT recommended)
- On a dedicated circuit (no other receptacles, switches or loads in the circuit)
- Connected to a standard breaker of appropriate size (GFI breaker of the same size NOT recommended)
- Rated for Class A (5 mA +/- 1 mA trip current) as per UL 943 standard)
- In good condition and free from any loose-fitting gaskets (if applicable in outdoor situations)
- Protected from moisture (water, steam, high humidity) as much as reasonably possible

**WARNING**

**TIP OVER HAZARD**
Appliance is top heavy and tips easily when not completely installed. Keep doors closed until appliance is completely installed and secured per installation instructions.

Use two or more people to move and install appliance. Failure to do so can result in death or serious injury.

**WARNING**

**ELECTRICAL SHOCK HAZARD**
Disconnect power or turn power disconnect switch to OFF position before removing top grille. Failure to do so can result in death or electric shock.

Most of the unit’s weight is at the top. Extra care is needed when moving the unit to prevent tipping. Use cardboard shipping material or plywood under unit until it is installed in the operating position to protect floor surface.

*Note: Custom panel models fit flush in 25” (63.5 cm) deep cabinet openings. They can be installed in standard 24” (61.0 cm) deep openings. The door face and top grille will protrude 3/4” (1.9 cm) into the room.*
Cutout Dimensions (All Refrigerator/Freezer)

One 2”x4” mounting board
1-1/2” (3.8 cm) x 3-1/2” (8.9 cm)

Note: If unit is installed deeper than 24” (61.0 cm), then shim behind the mounting board by the difference.

Bottom of anti-tip board is 3-7/8” (9.8 cm) below the opening height.

Note: Top of unit must be placed firmly under anti-tip board.

Anti-Tip Dimensions (All Refrigerator/Freezer)

One 2”x4” mounting board 1-1/2” (3.8 cm) x 3-1/2” (8.9 cm)

Note: If unit is installed deeper than 24” (61.0 cm), then shim behind the mounting board by the difference.

Bottom of anti-tip board is 3-7/8” (9.8 cm) below the opening height.

Note: Top of unit must be placed firmly under anti-tip board.
One 2"x4" mounting board
1-1/2" (3.8 cm) x 3-1/2" (8.9 cm)

Note: If unit is installed deeper than 24" (61.0 cm), then shim behind the mounting board by the difference.

Bottom of anti-tip board is 3-7/8" (9.8 cm) below the opening height.

Note: Top of unit must be placed firmly under anti-tip board.

*For installation of two units side-by-side, a separate grille kit accessory must be purchased.

**Note: Custom panel models fit flush in 25” (63.5 cm) deep cabinet openings. They can be installed in standard 24” (61.0 cm) deep openings. The door faces and top grille will protrude 3/4” (1.9 cm) into the room.

---

* Specifications (All Refrigerator/Freezer)

** Dimensions (All Refrigerator/Freezer)

- Specifications (All Refrigerator/Freezer)
  - Overall width: 75-15/16” (192.9 cm)
  - Overall height: 3-1/2” (8.9 cm)
  - Overall depth: 1” (2.54 cm) between units
  - Overall width: 35” (88.9 cm)
  - Overall height: 82-7/8” (210.5 cm) min. to 84-15/16” (213.5 cm) max.
  - Overall depth: 82-7/8” (210.5 cm) min. to 84-15/16” (213.5 cm) max.

** Measurment varies (locally supplied hardware)**

- Overall width: 23-13/16” (60.5 cm)
  - 24-3/4” (62.9 cm)
  - 35-1/2” (90.2 cm)
  - 35-1/2” (90.2 cm)
**Cutout Dimensions** (All Refrigerator/Freezer)

**Anti-Tip Dimensions** (All Refrigerator/Freezer)

**One 2”x4” mounting board per unit 1-1/2” (3.8 cm) x 3-1/2” (8.9 cm)**

**Note:** If unit is installed deeper than 24” (61.0 cm), then shim behind the mounting board by the difference.

**Bottom of anti-tip board is 3-7/8” (9.8 cm) below the opening height.**

**Note:** Top of unit must be placed firmly under anti-tip board.
One 2”x4" mounting board per unit 1-1/2" (3.8 cm) x 3-1/2" (8.9 cm)

Note: If unit is installed deeper than 24" (61.0 cm), then shim behind the mounting board by the difference.

Bottom of anti-tip board is 3-7/8" (9.8 cm) below the opening height.

Note: Top of unit must be placed firmly under anti-tip board

Note: Dimensions shown for 36" All Freezer/All Refrigerator model on the left. Reverse mounting boards if units are installed on the right.
**Anti-Tip Dimensions** (All Refrigerator/Freezer)

One 2" x 4" mounting board per unit. 1-1/2" (3.8 cm) x 3-1/2" (8.9 cm)

**Note:** If unit is installed deeper than 24" (61.0 cm), then shim behind the mounting board by the difference.

Bottom of anti-tip board is 3-7/8" (9.8 cm) below the opening height.

**Note:** Top of unit must be placed firmly under anti-tip board.

---

**Cutout Dimensions** (All Refrigerator/Freezer)

**Water Line Entry Area**

*Note:* Cutout opening shown with All Freezer model on left. Reverse water line entry if All Freezer model is on right.

---

**Anti-Tip Dimensions** (All Refrigerator/Freezer)

Dual 36” All Refrigerator/Freezer

**Note:** See anti-tip board installation.

Bottom of anti-tip board is 3-7/8" (9.8 cm) below the opening height.

**Note:** Top of unit must be placed firmly under anti-tip board.
Overlay Dimensions (All Refrigerator/Freezer)

Note: Hardware placement can vary depending on single or dual installation.

Note: Panel overlays must be dry, solid, straight one piece panels. The use of multiple panel pieces to achieve the dimensions is not recommended.

Custom Grille Dimensions (All Refrigerator/Freezer)

Note: Optional hinge cover can be attached using a strong VHB tape, countersunk wood screws or short nails from a nail gun.
Custom Grille Dimensions (All Refrigerator/Freezer)

36” Custom Grille

Reverse dimensions for other end.

Note: Optional hinge cover can be attached using a strong VHB tape, countersunk wood screws or short nails from a nail gun.

Custom Grille Dimensions (All Refrigerator/Freezer)

Dual 30” Custom Grille

Note: Use a custom grille on a dual installation, you must purchase the center trim kit FC7X3.

Note: Optional hinge cover can be attached using a strong VHB tape, countersunk wood screws or short nails from a nail gun.
Custom Grille Dimensions (All Refrigerator/Freezer)

**Dual 30” & 36” Custom Grille**

Note: Dual units can only be made in a left and right hand configuration.

Note: To use a custom grille on a dual installation, you must purchase the center trim kit FCTKSS.

Note: 30” unit is on left and 36” unit is on right.

Note: Optional hinge cover can be attached using a strong VHB tape, countersunk wood screws or short nails from a nail gun.

**Dual 36” Custom Grille**

Note: Dual units can only be made in a left and right hand configuration.

Note: To use a custom grille on a dual installation, you must purchase the center trim kit FCTKSS.

Note: Optional hinge cover can be attached using a strong VHB tape, countersunk wood screws or short nails from a nail gun.
Custom panel models, (with 3/4" [1.9 cm], thick panels and custom handles locally supplied), fit flush in 25" (63.5 cm) deep (countertop depth) cabinet openings with no protrusion into room except custom handles.

Custom panel models can be installed in standard 24" (61.0 cm) deep openings. However, the door faces and top ventilation grille will protrude 3/4" (1.9 cm) into the room. This is ideal for alignment with full overlay cabinet doors.
Custom Side Panel Dimensions

- Z-Bracket: 21-3/4" (55.2 cm)
- 3/4" (1.9 cm)
- 1/4" (0.6 cm)
- Optional kickplate notch (Dimensions determined by cabinets)

Custom Panel General Information

Custom finishing options
- All installations must allow for the refrigerator and freezer door to open a minimum of 90°.
- For side wall or corner installation, allow for a standard 3" (7.6 cm) cabinet filler to assure door(s) opens 90°.

Note: If a custom handle is used, a wider filler may be necessary.

- Panel thickness must not exceed 1" (2.5 cm) on hinge side. Thicker panels will interfere with door swing and clearance.
- Door panels should be installed after the refrigerator has been plugged in for at least 24 hours.

Ice and Water Dispenser Bezel Removal (if required)

1. Remove packaging material surrounding bezel.
2. Grasping the sliding lever, pull away from bezel.
3. Remove spill tray from lower part of bezel exposing 2 screws.
4. Remove screws.

*Note: Depending on how high leveling feet are raised, and cabinet enclosure height.

Note: Adding 3/4" (1.9 cm) side panels adds an additional 3/4" (1.9 cm) to the overall width of the product for each side panel used.

Note: Requires side panel hardware kit (SPHKDS).
Ice and Water Dispenser Bezel Removal (if required cont.)

1. Remove handle side cabinet screws and trim with a phillips screwdriver.
2. Remove all screws from handle side door trim.
3. Remove two screws from top and bottom door trim. Remove handle side door trim.
4. Remove bracket.
5. Measure and mark the first hole for each bracket.
6. Attach "Z" bracket to the hinge side of custom panel.
7. Attach "Z" bracket to the handle side of custom panel.
8. Push custom wood panel onto door.

Note: Bezel needs to be pulled from the bottom first and then pull slightly downward to clear the water dispensing tube.

Custom Door Panel Installation (Refrigerator or Freezer)

6. Remove 2 additional screws under top section of bezel.
7. Remove mounting support.
8. Grasping the bezel on both sides, pull away from the door cavity.
   Note: Bezel needs to pull from the bottom first and then pull slightly downward to clear the water dispensing tube.
9. Store bezel and spill tray in safe and secure place until installation.
Custom Door Panel Installation (Refrigerator or Freezer cont.)

1. Open freezer door. Remove door trim screws and door trim with a phillips screwdriver.
2. Remove bracket.
3. Measure and mark the first hole on each side of the bracket.
4. Attach bracket to the custom panel.
5. Align and slide custom wood panel onto door.
6. Reinstall door trim and door trim screws.

Custom Freezer Door Panel Installation (Bottom-Mount Only cont.)

7. Slide custom wood panel to the hinge side, ensuring "Z" bracket engages the door bracket.
8. Reinstall handle side door trim and door trim screws.
9. Reinstall cabinet trim and screws.
Adjust and reposition bezel as necessary. Tighten all screws securely.

Replace spill tray in lower part of bezel.

Align cube switch with sliding lever and firmly push until sliding lever is flush with bezel.

Install custom wood panels per product’s installation instructions.

Locate opening in door and position bezel. 
**Note:** Graphics on bezel will be on top end, tilt slightly forward to allow water tube clearance.

Push firmly into cavity until lower screw holes align with mounting holes on cavity.

Install two screws in lower part of bezel but **DO NOT** tighten all the way.

Install upper mounting support over holes underneath top section of bezel.

For a left hinge door, cut 5/8” x 2-3/4” in lower left corner. 
**Note:** Steps show panel upside down and notched for left hinge application. Mirror dimensions for right hinge door.

Use the roll of trim insert located in the drawer inside the unit to apply to the door trim.

Ice and Water Dispenser Bezel Installation (if required)

Ice and Water Dispenser Bezel Installation (if required cont.)
Remove air grille center blade.

Remove two 1/4" (0.6 cm) screws with a magnetic extended screwdriver at least 8" (20.3 cm) long.

Pull air grille assembly forward.

Remove 2 mounting brackets from the grille air assembly.

Using eight screws removed from the mounting brackets, attach mounting brackets to the custom wood grille using predrilled pilot holes. (See grille overlay specifications for proper alignment and pilot hole placement.)

Insert custom air grille assembly.

Install two 1/4" (0.6 cm) screws with a magnetic extended screwdriver at least 8" (20.3 cm) long.

Install custom air grille center blade.

**Bottom-Mount Custom Panel Hinge Cutout (if required)**

**Custom Grille Installation (cont.)**

For a left hinge door, cut 5/8" x 3" in lower left corner. **Note:** Steps show panel upside down and notched for left hinge application. Mirror dimensions for right hinge door.

Measure and cut 2-1/16" diagonal in lower left corner.

Cut out diagonal in lower left corner.

Final view of lower corner.

**Custom Grille Installation**

Remove air grille center blade.

Remove two 1/4" (0.6 cm) screws with a magnetic extended screwdriver at least 8" (20.3 cm) long.

Measur...
General Information

Area Requirements
Verify the following:
• Unit can fit into residence and can be moved around corners and through doorways.
• Floors can support unit’s weight plus food weight (approximately 1200 pounds [540 kg] per unit).
• Floors underneath refrigerator are level with surrounding finished floor.
• Rear wall is solid and is able to support two horizontally mounted 2 x 4s (included) bolted to two wall studs. The 2 x 4 board bolt heads must be flush with 2 x 4 to prevent obstruction.
• Remove anything attached to rear or side walls that can obstruct unit installation.
• Cutout dimensions are accurate.
• Electrical outlet is in correct location.
• Water line is in correct location.
• DO NOT install a refrigeration unit near a heat source, nor in a location where the surrounding temperature will fall below 60°F (16°C).

Electrical Requirements
It is the customer’s responsibility to:
• Contact a qualified electrical installer.
• Assume that the electrical installation is adequate and in conformance with the National Electrical Codes, ANSI/NFPA 70-latest edition or Canadian Electrical Code C22.1-1998 and C22.2 No. 5-M91 (or latest edition), and all local codes and ordinances.

A 115 volt, 60-Hz, 15 amp, fused, electrical supply is required. It is required that a separate circuit serving only this appliance be provided. This appliance is equipped with a power supply cord having a 3-prong grounding plug. To minimize possible shock hazard, the cord must be plugged into a mating 3-prong, grounding-type wall receptacle.
DO NOT use an extension cord.
If codes permit a separate grounding wire to be used, it is recommended that a qualified electrician determine that the grounding path is adequate.
DO NOT ground to a gas line. Check with a qualified electrician if you are not sure if the appliance is properly grounded. DO NOT have a fuse in the neutral or grounding circuit.

Anti-Tip Requirements
The anti-tip boards should be fastened into position prior to moving the unit into the opening.
Note: Additional mounting boards may be required if the unit does not touch the back wall of the enclosure. To prevent unit from tipping forward, it must be secured in place with a solid soffit or wood block.

Water Supply Requirements
Use only 1/4" (6 mm) copper tubing for water line. DO NOT install copper tubing in area where temperatures drop below 35°F (1.7°C). Before attaching copper tubing to the unit, flush at least 2 quarts (1.9 L) of water through the copper tubing and into a bucket to remove any particles in the water line.

• Viking Range Corporation is not responsible for property damage due to improper installation or water connection.
• Connect 1/4" (6 mm) flexible copper tubing to household plumbing in compliance with local codes and ordinances.
• Length of copper tubing must reach from water supply connection to the unit connection with an additional length to facilitate moving the unit out of enclosure for cleaning or service. Tubing should be soft instead of rigid and ends should be free of burns.

WARNING
To avoid serious illness or death, DO NOT use unit where water is microbiologically unsafe or of unknown quality. Without adequate disinfection before or after the system, Systems certified for cyst reduction may be used on disinfected water that may contain filterable cysts. The contaminants or other substances removed or reduced by this water treatment system are not necessarily in your water.

• Copper tubing route must be above 35°F (1.7°C) to prevent water line from freezing.
• DO NOT use plastic water lines from the household plumbing to the water inlet valve connection on the refrigerator unit.
• DO NOT use the self-piercing feature of a saddle valve. The hole made by the piercing lance is too small for the water flow rate required by the ice maker.
• If saddle valve is not used, place a separate shut-off valve in an easily accessible location between water supply and the unit. DO NOT install shut-off valve behind the unit.
• The installation of units with a reverse osmosis system is acceptable as long as the water pressure remains within the allowable PSI as stated below. It is important to note that with many reverse osmosis systems, the pressure starts off high, but then it decreases as the water level of the reverse osmosis storage area drops. This must be considered when checking the water pressure coming into the unit.
• Connect a vertical or horizontal 1/2" (1.2 cm) to 1-1/4" (3.2 cm) COLD water line near water area.
• Run water line through the floor, back, or side wall. Tubing should lay flat on floor underneath the unit. Clamp tubing to wall or floor.
• Water pressure must be greater than 20 psi and less than 120 psi on non-dispensers and greater than 35 psi and less than 120 psi on dispensers.
General Information

• Most of the unit’s weight is at the top. Extra care is needed when moving the unit to prevent tipping.
• DO NOT remove protective film until unit is in operating position.
• All four leveling legs must make contact with the floor to support and stabilize the full weight.
• DO NOT drop unit.
• Remove exterior shipping materials prior to moving unit into home.
• Use two or more people to move and install unit. Failure to follow this instruction can result in back or other injury.
• To avoid personal injury, wear gloves when performing any installation procedure and wear eye protection when cutting metal straps.

Tip Over Hazard
Appliance is top heavy and tips easily when not completely installed. Keep doors closed until appliance is completely installed and secured per installation instructions. Use two or more people to move and install the appliance. Failure to do so can result in death or serious injury.

Unpacking unit
1. Remove top and bottom strap.
2. Remove top cap.
3. Cut rear of carton approximately 1/4” (0.6 cm) to 1” (2.5 cm) from right corner with a utility knife extended 1/4” (0.6 cm).
4. Remove carton and exterior packaging. Save cardboard shipping material to protect floor surface when installing unit. Remove anti-tip board, kickplate and door trim pieces (DF models) from rear of unit.

Moving Unit

1. Remove shipping brackets from skid by removing four bolts (two on each side) with a 1/2” deep-well socket wrench and a pair of pliers.
   Note: Tilting unit is not required to remove shipping bracket.

2. Slip cart between unit and skid. Remove unit from skid.

Installation

1. Place unit in front of cutout.
2. Pull the center grille louver up at an angle and pull out.
3. Using an 8” magnetic nut driver, remove the two 1/4” screws.
4. Remove grille assembly.

Note: Use excess packaging to protect decorative trim; also, verify that leveling legs are up (0” adjustment).
Hinge Adjustment

1. **Step 5**
   - Remove four side screws and remove unit top.

2. **Step 6**
   - Loosen the four hinge screws. Adjust door. Retighten four hinge screws.

3. **Step 7**
   - Replace unit top and four side screws.

4. **Step 8a**
   - Attach one 2 x 4 to wall stud (refer to dimensions page for exact location).

5. **Step 8b**
   - If needed, depending on cabinet and depth, attach second 2 x 4 to first 2 x 4.

6. **Step 9**
   - Plug in power cord to verify operation. Note: Make sure power switch and showroom switch are in the "On" position.

7. **Step 10a**
   - Place unit within 3" (7.6 cm) of being flush with cabinets. Note: To avoid cabinet damage, place cardboard between cabinets and unit. When moving unit, DO NOT crimp, kink or crush water supply line.

8. **Step 10b**
   - Carefully move unit until semi flush with cabinet (depending on unit).

9. **Step 11**
   - Pull supply tubing forward under unit. Note: DO NOT use plastic water lines.

10. **Step 12**
    - Flush water line by running two quarts of water into a bucket. Turn water off.

11. **Step 13**
    - Connect supply tube to water valve using a 1/2" wrench. Note: DO NOT overtighten.

12. **Step 14**
    - Turn on water supply and check for leaks.
Lift unit off rollers to desired height and level unit using a 5/16” head wrench.
Note: DO NOT use an electric device. Overtightening can cause damage.

Verify that drain pan is installed and aligned.

Align holes on both ends of louvered panels and insert screws.

Using a phillips screwdriver; attach the kickplate to the unit and adjust to desired height.

Attach positive secure self-tapping bolts to 2 x 4 using a 22” extension.

Open refrigerator door so door stop and shoulder screw are accessible.
Note: Shoulder screw should be in 110˚ door opening position.

Remove shoulder screw and place in 90˚ or 120˚ position.

Door Stop Adjustment (Side-by-Side/All Refrigerator/All Freezer)

Door Stop Adjustment (Bottom-Mount)
**Water Filter System Specification and Performance Data Sheet**

This system has been tested according to NSF/ANSI 42/53 for reduction of the substances listed below. The concentration of the indicated substances in water entering the system was reduced to a concentration of less than or equal to the permissible limit for water leaving the system, as specified in NSF/ANSI 42/53.* *(100% safety factors built-in for unmetered usage for health claims only)*

*Based on the use of Cryptosporidium parvum oocysts

---

**Operating Specifications**

- **Capacity:** Certified for up to 750 gallons (2,838 L), up to nine months
- **Pressure Requirement:** 20 - 120 psi (1.4 - 8.2 bar)
- **Temperature:** 33-100°F (0.6 - 37.8°C)
- **Flow rate:** 0.78 gpm (2.9 L/min.)

*Check for compliance with the state and local laws and regulations.

**Note:** While the testing was performed under standard laboratory conditions, actual performance may vary. Must be installed and operated in accordance with manufacturer's recommended procedures and guidelines. Installation instructions, parts and service availability, and standard warranty are included with the product when shipped. This drinking water system must be maintained according to manufacturer's instruction, including replacement of filter cartridges.

Manufactured by: 3M Purification Inc.
400 Research Parkway
Meriden, CT 06470

---

**System tested and certified by NSF International** against Standard 42 for the reduction of chlorine taste and odor, particulate Class I and Standard 53 for the reduction of Lead, Lindane, Atrazine, Mercury, Toxaphene, Cyst, Turbidity, and Asbestos.
Final Installation

Replace top air grille.

Using an 8” magnetic nut driver, replace the two 1/4” screws.

Replace the center grille louver.

Open door. The display should flash.

Press “ACTIVATE CONTROLS” pad and close door.

Note: There is a 6 minute delay before the unit starts.

Performance Checklist

- Verify cabinet size.
- Verify electrical supply and water supply (if applicable).
- Install anti-tip device(s) and verify unit is secure.
- Position unit in cutout, level at desired height and secure unit.
- Plug-in unit and verify operation.
- Connect water supply (if applicable).
  - Verify icemaker fill tube is properly inserted.
  - Verify icemaker bail arm is down.
  - Verify dispenser operation (if applicable).
- Align/square door(s).
- Verify drain pan is properly installed and there are no leaks on water connection.
- Install kickplate.
- Remove internal packaging and labels and wipe unit down.

Bottom-Mount

Side-by-Side

1. Press “Activate Controls” pad.

2. Verify unit is not in Sabbath Mode.
   If in Sabbath Mode:
   A. The Sabbath Mode will disable the interior lights, display (except SAB indicator, temperature and compartment indicator) and alarm.

   To exit the Sabbath Mode:
   B. Press and hold “Activate Controls” and then “Display Off” for 3 seconds. (The control will beep three times to alert the user the Sabbath Mode has been exited.)

3. Verify unit is not in Showroom Mode.
   If in Showroom Mode:
   A. The Showroom Mode will disable the refrigerator system but all other functions are normal. These include lights and control. (If the refrigerator is in Showroom Mode, SHOW will be lit.)

   To exit Showroom Mode:
   B. Press and hold “Activate Controls”, while holding, press and hold “Higher” and “Alarm Off” together. (The control will beep three times to alert the user that Showroom Mode has been exited.)

4. Press “Activate Controls” then press and hold “Lower”, while holding, press and hold “Display Off” and hold until beeps (force start compressor).

5. All models need to be set at 38° F and 0° F for the Refrigerator and Freezer respectfully - factory setting.
