

# STAV Speaker Stands

Bowers & Wilkins is pleased to announce the introduction of a new range of speaker stands. Designed to compliment the 600 Series 3, the range consists of three models – **STAV24**, **STAV20** and **STAV16**

The construction is uniform across the range; the base plate, top plate and pillars are made from heavy gauge, mild steel. The pillars are hollow to accommodate sand or other deadening material.

The **STAV24** and **STAV20** are both designed to hold stand-mount speakers with the slightly shorter **STAV20** suitable for larger products such as the DM602s3.

The **STAV16** is intended for centre channel speakers as its top plate features an upturn at the back to prevent the speaker sliding backwards. This is particularly useful in installations where the centre channel is installed low down to clear a screen and may need to be tilted upwards towards the listener.

## Specifications

Model	STAV 24	STAV 20	STAV 16
Height without spikes	610mm (24 in)	508mm (20 in)	406mm (16 in)
Base width	240mm (9.5in)	240mm (9.5in)	240mm (9.5in)
Base depth	300mm (11.8 in)	300mm (11.8 in)	300mm (11.8 in)
Top width	200mm (7.9 in)	200mm (7.9 in)	340mm (13.5 in)
Top depth	180mm (7.1 in)	180mm (7.1 in)	265mm (10.5 in)
Net weight	4.3kg (9.5 lb)	3.9kg (8.5 lb)	3.5kg (7.7 lb)
Material base	Steel	Steel	Steel
Material top	Steel	Steel	Steel
Material pillars	Steel	Steel	Steel
Finish	Black paint	Black paint	Black paint
